THIS CHANGE ORDER PROVIDES FOR:

Through Assembly Bill (AB) 75, the California Waste Management Board now requires the district to submit an annual report showing annual solid waste diversion activities that have taken place over each calendar year. The Division of Construction is working with the division of design to develop a reporting system that is integrated into the design process for next year's report.

AB 75 was passed into law requiring all state agencies to meet certain recycling mandates. The language in the bill states that the material is to be diverted from entering landfills. For this year's report, your assistance is required to collect diversion activity information for a representative sample of projects that were under construction during the 2001 calendar year. This may be achieved by a variety of methods including recycle, reuse, salvage, donation, or reprocessing into an alternative product.
